

## Placement of Glowing Ember and Stones.

All of our Gas Log Sets come with two bags with stones and embers.

The large bag contains a simulation of stones made out of a foamy material, which you can place around the burner.

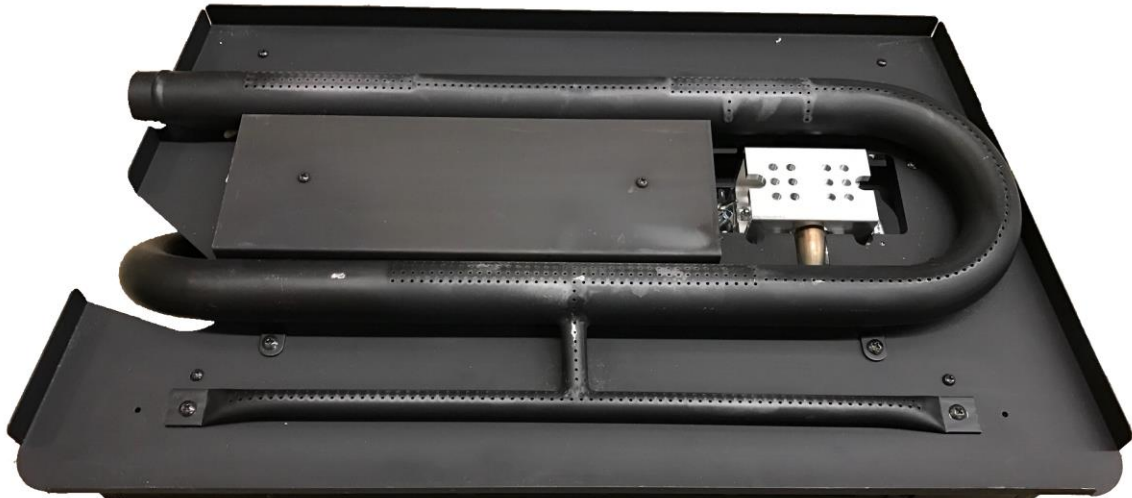

The smaller bag contains a material very similar to cotton. These are glowing embers.

The stones can be placed as you prefer but you need to follow these clearances.

You **CAN NOT** place anything in front of the gas log closer than 5 Inches.

5 Inches

5 Inches

We recommend you place the stones on the front tray of the unit as shown in the picture below.

Now, you will place the glowing embers covering the front burner, as shown below.

The embers help create the look of smoldering wood embers. A simple solution to giving your fire a beautiful and more natural look, when the flames from your fire hit these embers, they glow red like real wood. These are non-consuming, so they can be lit and re-used many times.

After you set everything it should look similar to the picture below.

Keep in mind, the stones and glowing embers are intended for decoration and are meant to be placed as the customer sees fit as a personal touch.

If you would like some guidance on the placement, please reach out to us to discuss further at 877-670-8428 or [service@thermablaster.com](mailto:service@thermablaster.com).
